

Module 3 – Week 4

By: Samuel Rodríguez Quintero

My website is about one of my favorite artists, who has accompanied me through difficult times in my life. I designed it in a very minimalist, flat, and simple way. I wanted to focus on the content and make it interactive just enough to be necessary. I used SPA, which is what I'm developing this week, and a bit of CSS with transform, hovers, and gradient colors. I wanted to add videos and additional information, but I couldn't for this first version. Perhaps in the future I'll improve it and add more life and design, partly for optimization.

Finally, I tried to make it slightly interactive in terms of what it looked like, allowing the user to access Joji's social media and my contact information, listen to Joji's songs, and return to the main menu. The page is also adapted to devices with a screen smaller than 768 pixels.

I provided screenshots of the code and how the page looks visually on devices like tablets and cell phones. It meets the Moodle requirements. I will also include it in my portfolio as a mini-project.

Steps to view the page:

Step 1: Unzip the zip files

Step 2: Access the folder

Step 3: Find the 'index.html' file and open it in your browser by double-clicking it or right-clicking it and opening it with...
